		Tanto						
		Paul Ip SPE Art Unit: 2828						

Continuation of 5. does NOT place the application in condition for allowance because:

The recitation of a first semiconductor laser directly or indirectly mounted onto the mounting surface of the stem and a second semiconductor laser element disposed on top of the first semiconductor is not patentable over Kato et al. '325. Kato et al. show in figure 5 two laser chips are mounted one on top of the other as required by the claims. Furthermore, the recitation of "a stem having a mounting surface" in the claims is different from figures 7A to 7C. The claims recite one laser chip mounted on top of another laser with different temperature is notorious old in the art. Kato et al show in figure 5 two laser chips with different sizes met the temperature requirement recited in the claims, because the temperature of the chip is proportional to the size and volume of the chip as shown in figure 5. The claims are not patentable over Kato et al .
